Dienolone was great for leaning out but not much in the gains department. I'm sure it would stack well with a bulker but not sure what point it would serve at that point other than to limit fat gain. Dien sounds good for my purposes of leaning. Lucky, I found a research lab selling the transdermal solution.

I heard is really bad soluble . It has the normal mg/ml ratio of an acetate or propionate. 100mg/ml is the max I've seen. I agree w/ raysd21. . 100mg is the highest I've seen. I have heard its unstable @ 100mg + thus should be done @ 50-75mg/ml but that might be broscience.

Anyone have any dienolone or dienedione? : r/steroids - Reddit

Buy Trenbolone Acetate is an anabolic steroid. It is considered one of the most powerful performance-enhancing drugs ever made. As compared to other drugs of the same function, it starts to show its effects rather rapidly. In earlier days the drug was used to increase muscle mass and strength in the animal stock.

Trenbolone Acetate Cycle. A Trenbolone Acetate cycle may be the single most exciting anabolic steroid cycle any man could ever plan. This is a highly powerful and tremendously versatile anabolic steroid that is far more effective than numerous other steroids stacked together. While that is appealing, we have a bit of disappointing news for some .
