USPS X-raying Packages: What You Need to Know | Shipping Cafe

Step 4: Address Your Package. Please write the address parallel to the longest side of the package, and make sure your return address, the delivery address, and postage will fit on the same side. TIP: If you'll be printing a shipping label (with postage included), you can use that instead of a separate address label.

Best Practices for Mail Center Security . - Home - Aboutps

The USPS says some mail is x-rayed. They give no indications about which pieces are selected. CeleryQtip • 7 mo. ago I bet all packages pass by a metal detector to be x-rayed later, or similar sensors to detect explosives and other easily detected weapons. MGjoker09 • 7 mo. ago

X-Ray/X-Rayed packages USPS : r/SilkRoad - Reddit

The only reasons why ups/FedEx would open a package is if it's: 1. fuming. 2. Leaking. 3. Reaking. (I'll just refer to those 3 as "a 3" for simplicity) So make sure it's packaged tightly, won't fall apart, it doesn't reak of whatever and it'll be fine. If a loader/unloader comes across one of the 3, they are not allowed to touch it.

Mail Security - USPS

USDA may be limited in their inspection authority; however, The Endangered Species Act [16 § 1540 (e)] states that authorized U. S. Fish and Wildlife Service (and Treasury) personnel "may detain for inspection any package, crate, or other container including its contents, and all accompanying documents upon importation or exportation. "
