A full-fledged Dianabol 20 solo cycle starts from 200 tablets. In this case, the cycle duration is up to 8 weeks. It is advisable to take this steroid, gradually increasing the dose from 20 mg per day to 50 mg per day. Take pills with meals, while drinking plenty of water. This gradual increase has a positive effect on the results. For a solo course of Dianabol, 20 to 40 mg per day will be sufficient for beginners. If you are using a compound based on different drugs, reduce the dosage of Dianabol to 10 to 20 mg per day. Divide the total number of pills into 2-3 equally timed intakes. Use Dianabol on an empty stomach for better assimilating.
