Proviron 25mg 20tabs Proviron Introduction, History, and Overview. Proviron is the trade / brand name for the androgen known as Mesterolone. It is an oral product, and is not considered an anabolic steroid. This is because its anabolic activity is known for being extremely weak - so weak, in fact, that it can be practically considered nonexistent. Proviron carries an androgenic rating of 30-40 and an anabolic rating of 100-150. All ratings derive from and are measured against testosterone, which carries a rating of 100 in both categories. Despite having an anabolic rating that is potentially greater than testosterone, Proviron will display very low anabolic traits. #biology #biologia #biolove #biologist #biologo #medvet
