Pregnyl HCG. Pregnyl HCG 5000IU is an active substance called chorionic gonadotropin that is naturally produced from the urine of pregnant women. An external injection stimulates the ovulation process and regulates ovulation in women. Pregnyl cost is a hormone used in boys (before puberty) to cause the normal fall of the testes in the scrotum. Pregnyl injection is also used in some boys to.

HCG Pregnyl 5000 IU Organon. 1mg anastrozole 100 tabs CJC-1295 (ALLEY) \$ 90.00 \$ 80.00. HCG

Pregnyl 5000iu is an post cycle steroid and is made by Organon. The active substance is Human Chorionic Gonadotropin. HCG, is not an anabolic/androgenic steroid but a natural protein hormone which develops in the placenta of a pregnant woman. [content](#)

Pregnyl 5000 Iu (Generic HCG) is not an anabolic/androgenic steroid but a natural protein hormone which develops in the placenta of a pregnant woman. HCG is formed in the placenta immediately after nidation. It has luteinizing characteristics since it is quite similar to the luteinizing hormone LH in the anterior pituitary gland.

Took a 5000 iu blast to get things going since my balls had to be dead from long ass cycles. Had low sperm count too. 1 week after taking the blast, I took 250 iu ed. Maintained most of my size strength but not weight. Took it during cycle and came off very smoothly. Sperm count 3x normal after HCG and made a baby. So pregnyl has my vote.
