In gearing up to do my first short cycle, it seems that Propionate is a better choice to Cypionate due to it being a shorter ester. From what I read, the shorter the ester the less the chance for excessive androgenic effects, aromatization, etc. That being said is it better to take 2 weekly injections of Test prop (equaling 200 mg) vs. 200 mg once a week of Test Cyp? Hi guys, i am about to start my second cycle and i am having second thoughts about using test prop as i have never pinned anything before. lol i am ready to pin myself 4x a week if test prop is a better choice but if i can get the same result from a longer ester then why not save some money and.

Test E vs. Test Cyp vs. Test Prop. Results 1 to 9 of 9 Thread: Test E vs. Test Cyp vs. Test Prop. Thread Tools. Show Printable Version; 12-03-2012, 05:48 PM #1. smalld01. View Profile View Forum Posts Private Message Member Join Date Oct 2012. Posts 71. Thanks 0 Thanks 0 Thanked in 0 Posts.

But for some reason, Test Cyp is favored over Enanthate. It is dissolved in sesame oil. If you are allergic to any one of these two oils, you can just swap it for the other one. Test E has a half-life of 8-9 days as well. Testosterone Propionate: Test Prop is a short-acting ester that has a half-life of just 3-4 days. It will result in the. [find out here now](#)

Testosterone Enanthate vs Cypionate vs. Propionate vs. Sustanon. the body. Because the body metabolises free testosterone in a matter of hours, The best way to simulate the bodies' natural testosterone production would be to administer it around the clock in the form of an I.V. drip. Been reading a bit on test prop today, and I'm surprised it's not more commonly suggested. Seems like guys spend a lot of time trying to get dialed in on Cypionate, a lot of them with no success. Test prop offers the ability to mimic some degree of diurnal variation, with less E2 conversion. I'll have to talk with Dr. Says about it.

test prop 125 mg eod. or. test cyp (or enan) 500 mg weekly. when this happens this will be my first cycle and i'd like to run it for about 10 weeks (i'm tempted to throw EQ in as well, but also realize i can probably get great gains with just the test) anyway i know it would be annoying to inject prop eod but i've heard it gives less bloat, and.

Test Prop VS Enanthate and Cypionate. Thread starter GdaddyGains; Start date Dec 31, 2019; Dec 31, 2019 #1 GdaddyGains Member. Once I get up to 500 mg of Test E or C I hold a lot of water, especially in my face, even with my estrogen in control.

Cypionate responds more slowly within the body prior to the advantages of taking the steroids are seen. Frequency of Doses. While propionate is the faster-acting steroid, the downside to this is that it wears off faster than the slower-reacting cypionate. This leads to the requirement to take propionate regularly to achieve the same results. [online](#)
