A Deep Dive into CJC-1295 and Ipamorelin Dosage - Peter MD

Tesamorelin is a 44-amino-acid long peptide that was created as a synthetic analog of growth hormone-releasing hormone (GHRH), which is normally produced in the hypothalamus. It stimulates the pituitary gland in your brain to increase your body's natural production of growth hormone (GH).

Tesamorelin Peptide: Benefits, Dosage & Side Effects - Jay Campbell

For Ipamorelin, the ideal dosage often lies between 200 to 300 mcg per day. Tesamorelin doses typically range from 0.5 to 2.0 mg per day. You're advised to inject these peptides at night, to mimic your body's natural HGH release patterns. One thing to note about this stack is the need to rotate your injection sites.

Tesamorelin, Ipamorelin 8mg (Blend) - PeptideSciences

The recommended dosage of this Blend is 300 mcgs. This is where it gets confusing for me. The adding of sterile water or BW. If you are adding more BW, like 2ml vs 1ml, then you are "thinning out" the mix. Which would mean you need to pull more (2x) to get the same amount (dosage) of Ipamorelin, CJC1295, correct?

Tesamorelin, CJC1295, Ipamorelin 12mg (Blend) - PeptideSciences

Frequency: Ipamorelin is typically administered multiple times a day, with two to three injections being a common dosage schedule. This frequent dosing helps maintain a steady release of GH throughout the day. Dosage Amount: An effective starting dosage of Ipamorelin is often around 100 to 300 mcg per injection. Like CJC-1295, the specific .
