A Comprehensive Guide To The Trenbolone Or Tren Cycle - Lee-Jackson

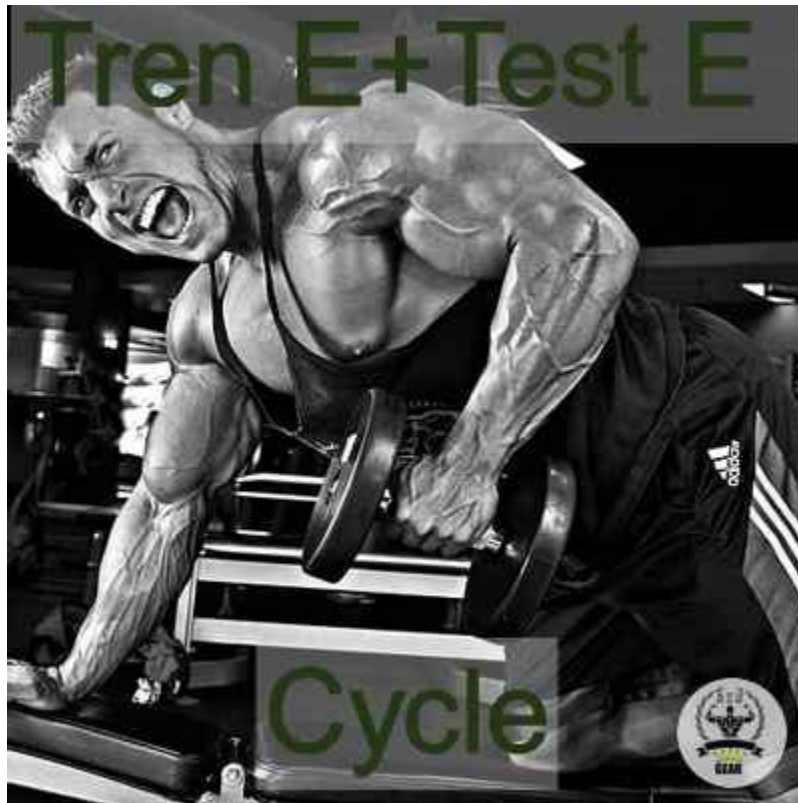

#1 I'm about to start a tren test cycle I'm currently on 110 mgs of test a week on trt. Would this dose be good and add 200 of tren? Or would I run them higher. And should I run tren higher or test higher, I've seen alot of contradictions on this. Also would three weeks of tren ace show any results? Thank you!

Test C, Tren E, and Dbol Cycle Advice? - Pharma / TRT - T NATION

Recommend tren at 300-350mg/week on a first cycle with it, 200 will have a MARKED effect, but slightly higher dosing will provide significantly more benefit with a limited increase in sides at the dose...most of the time. Either way start at 350, if its unbearable, drop it back slowly till you can run with it.

Tren A clears faster in case your body reacts poorly. If all you can get is E, then yea 400 Tren E / 400 Test E is a mainstay for me. You'll have to experiment to see if you fare better with higher Test / Lower Tren or the converse. IME, prolactin sides from Tren are greatly exaggerated. Keep your AI as you had been running previously.

Cycle: Test e & tren e cycle - eroid s

Unless you want to run the Test:Tren at 5+:1, which would make the use of Tren pointless and the cycle overall rather dangerous in itself. With Tren's hostile takeover of the ar's that leaves the Test out in the open, so to speak, it will really only have a part in sexual performance along with a great deal of side effects. With a high amount .

Test c/tren A/dbol cycle - AnabolicMinds

Well first of all u definitely mean 500mg and 50 mg instead of ml, secondly in my opinion running tren

higher than test is much better = less sides, and remember with tren u really dont need a high test dose nor a really high tren dosage for the first time, less is more so i would say get around TRT or slightly more for test and rock the tren higher something like 250-300mg test and 300-400mg .
