

This is an experience/discussion thread for the common combination of Testosterone, Trenbolone, and Masteron. I'd like to see this mostly follow the typical experience thread format but as long as it relative to the combination it's good. I see questions, cycle results, comments, preferred ratios scattered throughout this thread and .

## Trenbolone Cycle: The Ultimate Guide - Inside Bodybuilding

Last few cycles have been TTM low dose but fancied something different and been quite a while since I used eq last. As far as tren goes I have very minimal sides and tbf it's actually a euphoric drug for me, I've literally never been happier or more confident than when I've been on tren cycles. . I think test tren eq vs test tren masteron is .

Aug 18, 2021 #1 I'm 47 years old 5'11" 85kg I want to try using masteron and trenbolone together in the same cycle. Should I run some orals or a light testosterone dose too or are these together good? My goal is to recomp. And I workout 5 days a week, only take the weekends off. dylangemelli V. I. P. #1 Quick stats - 40, 235 @ 15% BF - maybe less. 5th or 6th cycle. I'm running Test Prop (for the first time / typically I run Test E) at 200mg EOD, Tren Ace @ 200mg EOD and Masteron @ 200mg ED. Also running 4 ius of HGH, and 500 ius of HCG twice a week. I'm on my 7th week of this cycle - the first 5 weeks I kicked it off w/ 60mg ED of Var.

## Tren Masteron Test Steroid Cycle for Muscle Gain - athletway

Jun 12, 2019 #1 I'm about to start a tren test cycle I'm currently on 110 mgs of test a week on trt. Would this dose be good and add 200 of tren? Or would I run them higher. And should I run tren higher or test higher, I've seen alot of contradictions on this. Also would three weeks of tren ace show any results? Thank you! Outofbody

Treat our first offering as a "test" run, following which you may integrate the enanthate variant and

increase your testosterone dose as we will soon specify. Beginner Masteron Cycle This masteron / test cycle is going to be perfect for those who want to create sustainable lean muscle tissue.

## Masteron Cycle: Results, Dosage, And Side Effects!

I think I'm likely going to taper my testosterone dose down from 1500mg/wk where it's currently at to 500mg/wk and then throw in the masteron @ 500mg/wk to start and the tren ace @ 250mg/week to start and obviously increase from there. Hopefully getting around 700mg/wk if sides are all good.

## [Compounds] Test/Tren/Mast AKA "The Holy Trinity" - Reddit

COACHING My Account Masteron 101 May 26, 2016 by John Doe Masteron is primarily used to give your muscle a granite hard, grainy look to them that no other steroid can duplicate. I really would categorize Masteron as a pre-contest drug. Masteron is not very effective unless you're already very lean.

## **Masteron 101 - John Doe Bodybuilding**

Although they are essentially the same compound, they have different esters. Trenbolone acetate is made up of short esters and enanthate, longer ones. This means that acetate will work faster than enanthate, and subsequently, cycles can be shorter.

**Moderate Masteron Cycle**

A moderate Masteron cycle is perfect for a mild cutting plan or for the purpose of enhancing athletic performance. Such a Masteron cycle will produce results that are largely dependent on your diet, but most men will find such a plan is very well-tolerated. If you've never used this steroid and you're looking for a moderate boost, the following Masteron cycle may be for you:

Week	Masteron	Testosterone Cypionate	Anavar	Arimidex
1	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
2	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
3	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
4	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
5	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
6	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
7	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
8	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk

\*\*\*Note\*\*\* Arimidex may or may not be needed.

**Intermediate Masteron Cycle:**

An intermediate Masteron cycle can be used for cutting or athletic performance. However, most athletes will not need such a Masteron cycle and will be happy with the moderate plan listed above. The intermediate Masteron cycle is perfect for all levels of steroid use experience with the exception being first time steroid users. If you have steroid use experience, with or without Masteron experience, the following Masteron cycle can be implemented.

Week	Testosterone Propionate	Trenbolone Acetate	Masteron	Winstrol	Arimidex
1	100mg/eod				0.5mg/eod
2	100mg/eod				0.5mg/eod

#1 Sampei Member AnabolicLab Supporter So what do you think it's a good dosage of masteron E for 600mg week of Tren? I was thinking from 400mg to 600mg. If I can get away with 400mg would be better, so I have less oil to pin but if it's considered useless then I'll increase it to 600mg.

## How To Cycle Masteron Correctly for Optimal Results| Masteron

A Test and Masteron cycle refers to a specific combination of anabolic steroids used by some individuals for performance-enhancing purposes, typically in the realm of bodybuilding or athletic enhancement. Test refers to testosterone, which is the primary male sex hormone and an anabolic steroid. Testosterone is responsible for promoting muscle .

## Test/Mast/Tren Blend | Evolutionary Steroids Research Forums

Normally the cycle length is 8 to 10 weeks and it should be combined at least with a testosterone steroid (ideally Testosterone Propionate for compatibility), while it also delivers excellent results when used with more powerful steroids like Winstrol or Trenbolone. Ive run test as high as 3g or 3. 5g/wk in the past and tren ace as high as 1400 or 1750mg/wk. This will be my 8th or 9th cycle. My general plan is as follows (but depending on my results this can be altered):  
Tbol @40mg/day (wk1-3) Tbol @60mg/day (wk4-6) Sustanon @500mg/wk (wk1-20)

## Masteron Dosage with Test: Optimizing Steroid Stacking for Enhanced Results

That's a good tren ace dose for a 1st time with tren. Masteron is low. I wouldn't bother with under 400 a week. Worked great for an AI for me last cycle. I would suggest 500-600 of mast to really se gains off it Let us know how u like tren bro. I'm looking at a similar ycle but maybe even less tren and primo instead of mast and adding some var in

I ran 400mg Deca and 25mg Tren/Masteron EOD. Sweet cycle with low sides and solid gains. Hindsight, I should have used Test to replace the Tren but it was in a blend with the Masteron. . especially with excess estrogen conversion from a decent dose of Test, incorporating a DHT derivative would be my move personally. That Masteron might not be .

## Masteron Cycle (Drostanolone Guide) - Steroid Cycles

Sep 30, 2023. #2. 250-300mg a week is what I would run the test at, I would run Test E , prop will be a hassle and alot of pinning. If you are going to cut or recomp to much test will cause bloat and water weight gain which u want to avoid so I'd keep the test at what I suggested.
