DHB (Dihydroboldenone) | Overhyped And Liver Toxic Injectable Steroid?

This compound is a powerful steroid, similar to Primobolan in its effects. Many supporters of DHB claim that it is twice as strong as Testosterone . Usually, this argument is predicated on the idea that injectable steroid DHB has a 200:100 anabolic: androgenic ratio. DHB is known to be more anabolic than equipoise, Testosterone and Deca Durabolin.

DHB: Dihydroboldenone with Ryan Root - Modern Biochemistry on Steroids .

DHB is a synthetic androstane steroid and a derivative of dihydrotestosterone (DHT). It is more commonly known as the 5-alpha reduced metabolite of Boldenone (Equipose). Just like how Testosterone interacts with 5-alpha reductase to produce dihydrotestosterone (DHT), Boldenone 5-alpha reduces into DHB (Dihydroboldenone).

DHB also has fewer side effects in comparison to other steroids which makes it ideal for athletes and professional bodybuilders. Female athletes can also use the steroid but in low dosages; it .

[Compound Experience Thread] 1-Test (DHB, Dihydroboldenone)

4 Next Page 1 of 4 musclebeauty Super Moderator 912 Posted February 11, 2019 DHB Steroid Today we're going to talk about the DHB steroid. DHB is also known as dihydroboldenone, it has its own classifications like DHT's are. They call it 1-testosterone, it really confuses people because they read it and think of Methyl 1-test.

Trenbolone vs. Dihydroboldenone [Compound] : r/steroids - Reddit

#1 I will hopefully be starting my next cycle (DHB + Anavar + Test prop) this weekend, and I just had a quick question regarding the injection schedule for the DHB (aka 1-test-cypionate). Since DHB is a long-ester steroid, does it only need to be injected once per week? Or is it better to inject it multiple times per week?

1-testosterone (dihydroboldenone), or DHB for short, is an anabolic steroid that has some unique properties of interest to bodybuilders. Interestingly, in spite of the fact that the name can be confusing, in no way is DHB testosterone. In fact, it is simply the 5alpha reduced form of Equipoise (boldenone), which acts in a completely different way.
