What is Post Cycle Therapy in Bodybuilding (PCT Guide) - Muscle and Brawn

HCG and LH are very similar in action, and even in pharmacokinetics. hCG is a hormone that consists of an α and a β -subunit, and LH has an identical α -subunit. There is a great difference in the β -subunit, resulting in HCG having a much longer half life in the body than LH (36 hours compared to 30 minutes)
