NEW ZEALAND CONSUMER MEDICINE INFORMATION

CANDESTAR
Candesartan cilexetil
4 mg, 8 mg, 16 mg and 32 mg tablets

What is in this leaflet

This leaflet answers some common questions about Candestar.

It does not contain all the important information. It does not take the place of talking to your doctor or pharmacist.

All medicines have risks and benefits. Your doctor will have weighed the risks of you taking Candestar against the benefits they expect it will have for you.

If you have any symptoms about taking this medicine, tell your doctor or pharmacist.

Keep this leaflet with the medicine. You may need to read it again.

What Candestar is used for

Candestar contains the active ingredient candesartan cilexetil. It belongs to a group of medicines called angiotensin II receptor blockers, or ARBs.

Candestar is used to treat:

- high blood pressure (hypertension)
- heart failure, especially with reduced heart muscle function.

Candestar works by blocking the effects of the hormone, angiotensin II. This causes relaxation of arteries of the blood vessels which results in a lowering of the blood pressure.

It also helps with heart failure by allowing the heart vessels, or the

its heart does not have to pump as hard to move the blood around the body. This also means that when you place extra demands on your heart, such as during exercise, the heart may take better to you. Any not get most of benefit in early.

Ask your doctor if you have any questions about why this medicine has been prescribed for you. Your doctor may have prescribed it for another reason.

This medicine is available only with a doctor's prescription.

Before you take Candestar

When you must not take it:

Do not take Candestar if you have an allergy to:

- any medicine containing candesartan
- any of the ingredients listed at the end of this leaflet.

Some of the symptoms of an allergic reaction may include: shortness of breath, wheezing or difficulty breathing, swelling of the face, lips, tongue or other parts of the body, rash, itching or hives on the skin.

Do not take this medicine if you have or have had any of the following medical conditions:

- second heart problems
- diabetes (Type 1 or 2) or moderate to severe kidney problems, and also taking any medicine containing medicine.

Do not take this medicine if you are pregnant. It may affect your developing fetus if you take it during pregnancy.

Do not breastfeed if you are taking this medicine. It is not known whether the active ingredient of Candestar passes into breast milk.

Do not give Candestar to children, babies and adolescents in children has not been established.

Do not take this medicine after the expiry date or if the bottle shows signs of tampering. If it has expired or is damaged return it to your pharmacist for disposal.

If you are not sure whether you should start taking this medicine, talk to your doctor.

Before you start to take it:

Tell your doctor if you have allergies to any other medicines, foods, preservatives or dyes.

Tell your doctor if you have or have had any of the following medical conditions:

- heart problems
- mild to moderate liver problems
- mild kidney problems.

If you have not told your doctor about any of the above, tell your doctor before you start taking Candestar.

Taking other medicines

Tell your doctor or pharmacist if you are taking any other medicines, including any that you
