

# Estanozolol 2 5mg | Stanozolol: Uses, Dosage & Side Effects - Drugs.com

Stanozolol is a man-made steroid, similar to the a naturally occurring steroid testosterone. Stanozolol is used in the treatment of hereditary angioedema, which causes episodes of swelling of the face, extremities, genitals, bowel wall, and throat. Stanozolol may decrease the frequency and severity of these attacks. El estanozolol es el segundo esteroide oral más utilizado en el mundo, despues del popular Dianabol (metandrostenolona). El winstrol se ve favorecido por su capacidad para promover el crecimiento muscular sin retención de agua, por lo que es altamente valorado por los culturistas y los atletas competitivos. Uso clínico del Winstrol (estanozolol)
