Deca 300 | Globalgen

Deca 300 consists of the specialty testosterone equivalent formula in its 300 mg form. Deca can convert natural testosterone into a DHT that is far more successful at feeding androgen cells and impacting muscle tissues throughout the body. If you need immediate performance results this is the help that you need.

So I have genpharma test 400 as the bottle says. But then below it says enanthe (300 mg) propionate (100mg) 400mg/ml So would that be considered 400mg dose? That considered a high dose right? Would you recommend a lower dose? Thanks. Free Report: [HOW YOU. do you agree](#)

Genpharma help - EliteFitness

Test Enanthate contains the male hormone, testosterone enanthate, which is metabolized into pure testosterone and has an identical action. Testosterone enanthate is a long ester that is effective giving you strong peaks right after the injection and stable slowly decreasing levels.

Genpharma help - EliteFitness

PHARMA BOLD 300 (Boldenone undecylenate) is an injectable steroid that exhibits strong anabolic and moderately androgenic properties. The well-balanced anabolic and androgenic properties of this

drug are greatly appreciated by athletes, who want to enhance their result without strong side effects. Boldenone greatly stimulates hematopoiesis.
