No a. a All unused Norditropin® products must be refrigerated (36°F to 46°F) prior to first use. Do not freeze and avoid direct light. After first injection, Norditropin® pens can either be stored outside of the refrigerator (up to 77°F) for use within 3 weeks, or in the refrigerator (between 36°F and 46°F).

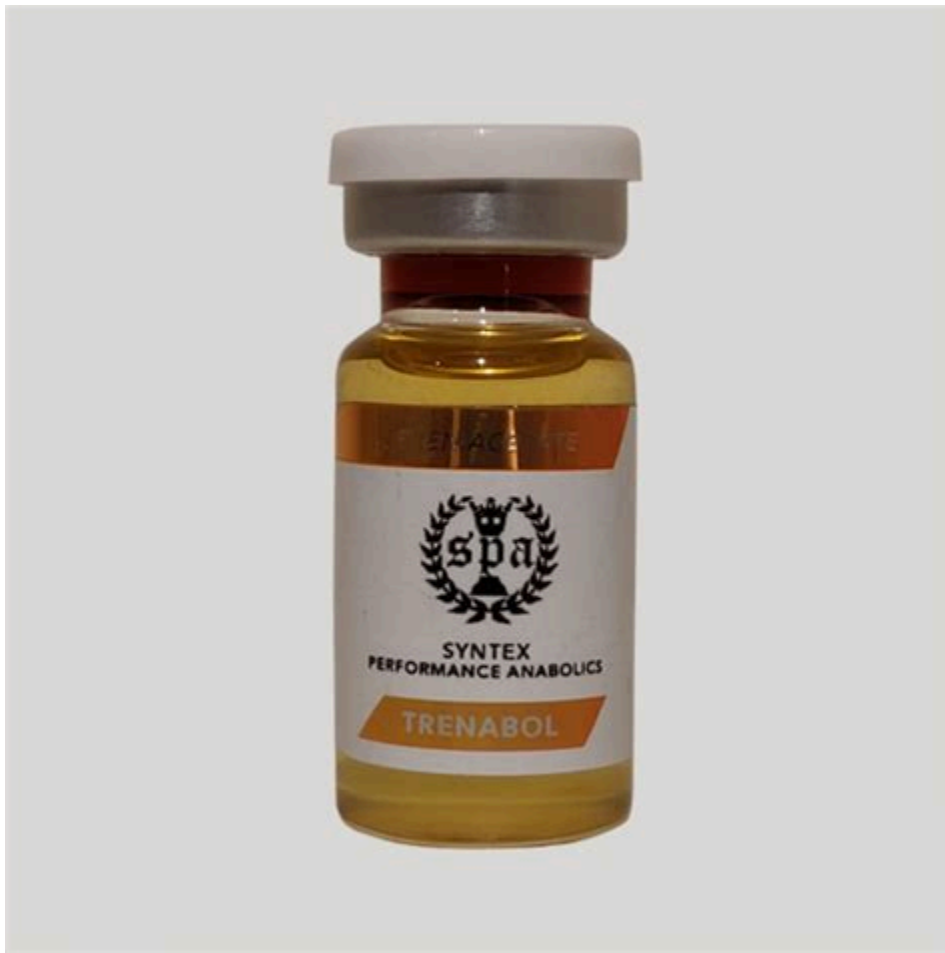

HGH Injection Treatment | Humatrope® (somatropin) for ...

Humatrope must be kept refrigerated (36° to 46°F [2° to 8°C]) before and after it is mixed. Do not freeze. Once Humatrope has been mixed and is in liquid form, cartridges must be used within 28 days and vials must be used within 14 days. Throw away any unused Humatrope in a cartridge after 28 days and in a vial after 14 days.

This can happen if the HUMATROPE Cartridge does not have enough HUMATROPE left in it for the full dose. At the end of the injection, the number in the dose window should be 0.00. If you see any number other than 0.00, this is the amount of HUMATROPE you did not receive. Write this number down and follow the steps below to get the rest of your dose. [official source](#)

How to Take Humatrope | Humatrope® (somatropin) for injection

If left out overnight, you may place it back into refrigerator and continue to use it. When traveling, keep it in the cooler provided in the starter kit for up to 10 hours, then put on ice after 10 hours. Be careful not to place GH pens directly in ice — keep them separate by placing pen in a Ziploc bag. Time of Day

How to Take Humatrope | Humatrope® (somatropin) for injection

What if norditroph medicine growth hormone is left out overnight? My child left the medicine. However, several meds require storage in the refrigerator or freezer to ensure stability. Somatropin (humatrope, nutropin aq., Somatropin is used to treat growth hormone deficiency in children.

Accidentally left HGH out overnight. Still good? I accidentally left my HGH out of the refrigerator for about 18 hours, because I went out during the day, and didnt come back until the next morning. It is Genotropin. Is it any good still? The liquid is still clear, but it was room temp at about 75 degrees. [find more info](#)
