Bro, sorry to disappoint you but test e cant hold at 300mg/ml, it would crash (crystals at the bottom).. Your test e is 250mg/ml at the best. so just pin 2 ml/week, in fact i'd go with 2.5 ml/week since the lab

lied about it being 300 mg/ml lol.

Description. These bloods were drawn on Friday morning 8 am 12 hours after last pin, I have been on 200 mg a week of SIS labs test E 300. Very happy with the results, I received this vial in a promo from supreme there was no point to run during blast since I only had one vial so I figured I would use during a cruise and then draw bloods to see quality of this lab.
