Not the best session today but happy with how the upper strength is going. Set myself to do a top set with 20kg each side, which has been done now it's for the 30s ☐

Everything went wrong during this including losing tightness during set up (edited it out because I'm a Kardashian) and it fuckin wobbled on the second rep. But huzzah we made it. Definitely want to clean it up and not be a cheeky cunt and touch and go rep it but sure look. HON THE LADS

Testosterone - The #1 Prescribed Steroid. When you go to the doctor to Get Steroids, your best shot will always lie with Testosterone. Now, if you are an otherwise healthy 25-year-old man with plenty of testosterone coursing through your veins, the chances of getting a prescription for exogenous testosterone are slim to none.

A positive energy balance, when more #calories are consumed rather than burned, is required for #anabolism and therefore muscle hypertrophy. An increased requirement for protein, especially branch chained amino acids, is required for elevated #protein synthesis that is seen in #athletes #training for #muscle hypertrophy.

Anabolic steroids may be taken as a pill, as a shot into a muscle, or as a gel or cream rubbed on the skin. Anabolic steroid medicines include testosterone cypionate (such as Depo-testosterone) and testosterone undecylenate (such as Andriol). In Canada, you need a prescription to get any anabolic steroid.

Typically, the right to obtain a legal prescription for an anabolic steroid is that you are at least 30 years old and should be able to support the purchase with a valid medical reason. In most cases, men buy such steroids to treat low levels of testosterone.
