I can tell if I'm on tren ace hours after jabbing. 300mg two weeks later would make me sweat more, especially after every carb meal, tons of energy etc. It should be easily noticeable. I believe tren is tren and you get the least side effects the more stable blood levels you have. Some people believe tren e is the best choice for that.

Parabolin Blend - 200 is a potent lean mass builder and cutting agent. Trenbolone itself has always been the favorite pre contest drugs, regardless of the ester used in its delivery. It is because of its strong anabolic and androgenic and does not convert to estrogen. Also of its very high quality muscle gain plus fat loss instead of gain.
