Anabolic steroids stimulate growth in many types of tissues, especially bone and muscle. Anabolic effects also include increased production of red blood cells. Androgens and anabolic steroids are used as replacement therapy to treat delayed puberty in adolescent boys, hypogonadism and impotence in men, and to treat breast cancer in women.

Still summer ☐ Crazy busy at @sblendednutrition this afternoon but this #applepie shake was definitely worth the wait and love that it comes with a free iced tea and aloe shot! ☐

☐ Users of anabolic steroids can become both physically and psychologically dependent upon the drugs, as evidenced by a drug-seeking behavior, continued use even with adverse effects, and physical withdrawal symptoms such as mood swings, fatigue, restlessness, loss of appetite, insomnia, reduced sex drive, and steroid cravings.

☐ Also have I mentioned it's the only place in the city where you can purchase some of the products from the Axe and Sledge supplement line ☐ you want a wild pump? Pick up some Ignition Switch and Hydraulic take them separately or stack them together for something extra intense.

Oral anabolic steroids are man-made drugs that act like testosterone. Common side effects are aggression, rage, violence, stroke, heart attack, high blood pressure and cholesterol, and breast enlargement in males. They are used to treat breast cancer, anemia, side effects from AIDS or HIV, and delayed puberty in boys, and testosterone deficiency. This type of drug is commonly abused.
