Indications Oxanabol is indicated for treatment of Turner's syndrome, chronic infections and recovery after extensive surgery. Oxanabol is manufactured by Alpha Pharma and is maintaining the exact same high quality of the compound, but is offering it for a cheaper price allowing everyone to get it if required. I've never changed. I still daydream while someone is talking to me, procrastinate before starting a project until I remember the beauty of the process, stay up until 7 am because I feel like doing whatever I have to do, speak fast in a low volume, take my time in everything. I do things with passion sometimes for no reason, I drink hot chocolate after I get out of bed. I eat pizza whenever I feel like

eating one, there are no rules for being happy anyway.

Be the first to review this Drug Oxandrolone is a man-made steroid, similar to the naturally occurring steroid testosterone. Oxandrolone is an anabolic steroid that promotes the growth of muscle tissue. Oxandrolone is used to help you regain weight lost after surgery, severe trauma, or chronic infections. Oxanabol is a steroid with low anabolic activity, stimulating the synthesis of creatine phosphate in muscle cells, which contributes to the increase in strength indicators.
