The OTPF 4 defines medication management as ♦ Communicating with the physician about prescriptions, filling prescriptions at the pharmacy, interpreting medication instructions, taking medications on a routine basis, refilling prescriptions in a timely manner♦. Medication management is described in the newly defined area of occupation, health management.

♦DOSING GUIDELINES: Research has determined that the most effective dose of this peptide is 43-45mcg per kg of body weight, administered once daily. FTPP is administered subcutaneously.

Testosterone Propionate promotes nitrogen retention in the muscle (6), and the more nitrogen the muscles hold the more protein the muscles store, and the bigger the muscles get. Testosterone Propionate can also increase the levels of another anabolic hormone, IGF-1, in muscle tissue (7).
