Dianabol dosage. On average, the dosage of Dbol per day is from 30 to 50 mg for four to six weeks. For beginners who are not familiar with the effect of steroids on the body, you can limit yourself to a dose of 30-40 mg. Such dosage will give an excellent result with minimal risk of side effects.

for Prison 2016

It is even better to use it as a kick starter to a steroid cycle. Run Dbol at 25mg/day for 8-weeks along with Testosterone (Any ester) at 350mg/week. By week 4, when the Test kicks-in, you will be strong and huge. Some users even run Dianabol at 50mg/day for 4-weeks only, making the most of the cycle at the maximum tolerable dose.
