I was considering doing 50mg anadrol and 20mg dbol for 4 weeks stacked with 500mg test and 750mg EQ. What do you guys think? Chados Well-known member. Awards 2.
Apr 17, 2019 #2 I don't like taking eq that high with two methylated orals. Anadrol and eq and your rbc will skyrocket . 0 Reactions: AnabolicGuru, Renew1 and SDPonce63.
Eu estava com receio de voltar a treinar por causa da covid, mas descobri que se você frequenta ambientes totalmente higienizados constantemente e usa uma máscara apropriada para atividade física, não tem como nada de ruim te atingir. É só alegria treinar na @r1sportsclub com a máscara da @safesportbrasil! (CÓDIGO DE DESCONTO: ESTRELINHA10)

Now let's talk about my carb up this morning ☐☐ message me for the secrets. Hahaha! Seriously though, if you guys haven't made it out to a show in Texas yet, you're missing out. Check out the schedule because we have some amazing shows still on the calendar for the remainder of this year. Hope to see you out. And stop us and say hello ☐☐

Dianabol is also considered to be a very effective oral steroid. But with dbol, you'll be retaining more water. This will cause a bloat which some people want to avoid. Comparing Anadrol vs dbol milligram for milligram, I'd say Adrol is definitely stronger. It just gives you this certain look that is hard to describe.
