Turinabol 101: Turinabol is an oral 17-alpha-alkylated (17-aa) anabolic steroid that is more closely related to Dianabol than any other steroid. A common thought is to compare Tbol to Anavar based on the types of gains but when we examine the steroid we find a bit of a different story. As you understand Dianabol is simply Methandrostenolone and ... By comparing yourself to others, you limit yourself to being only as excellent as they may be and in so doing, prevent yourself from achieving a higher level of accomplishment that you never knew possible. Let others be GUIDES not GOALS!!!

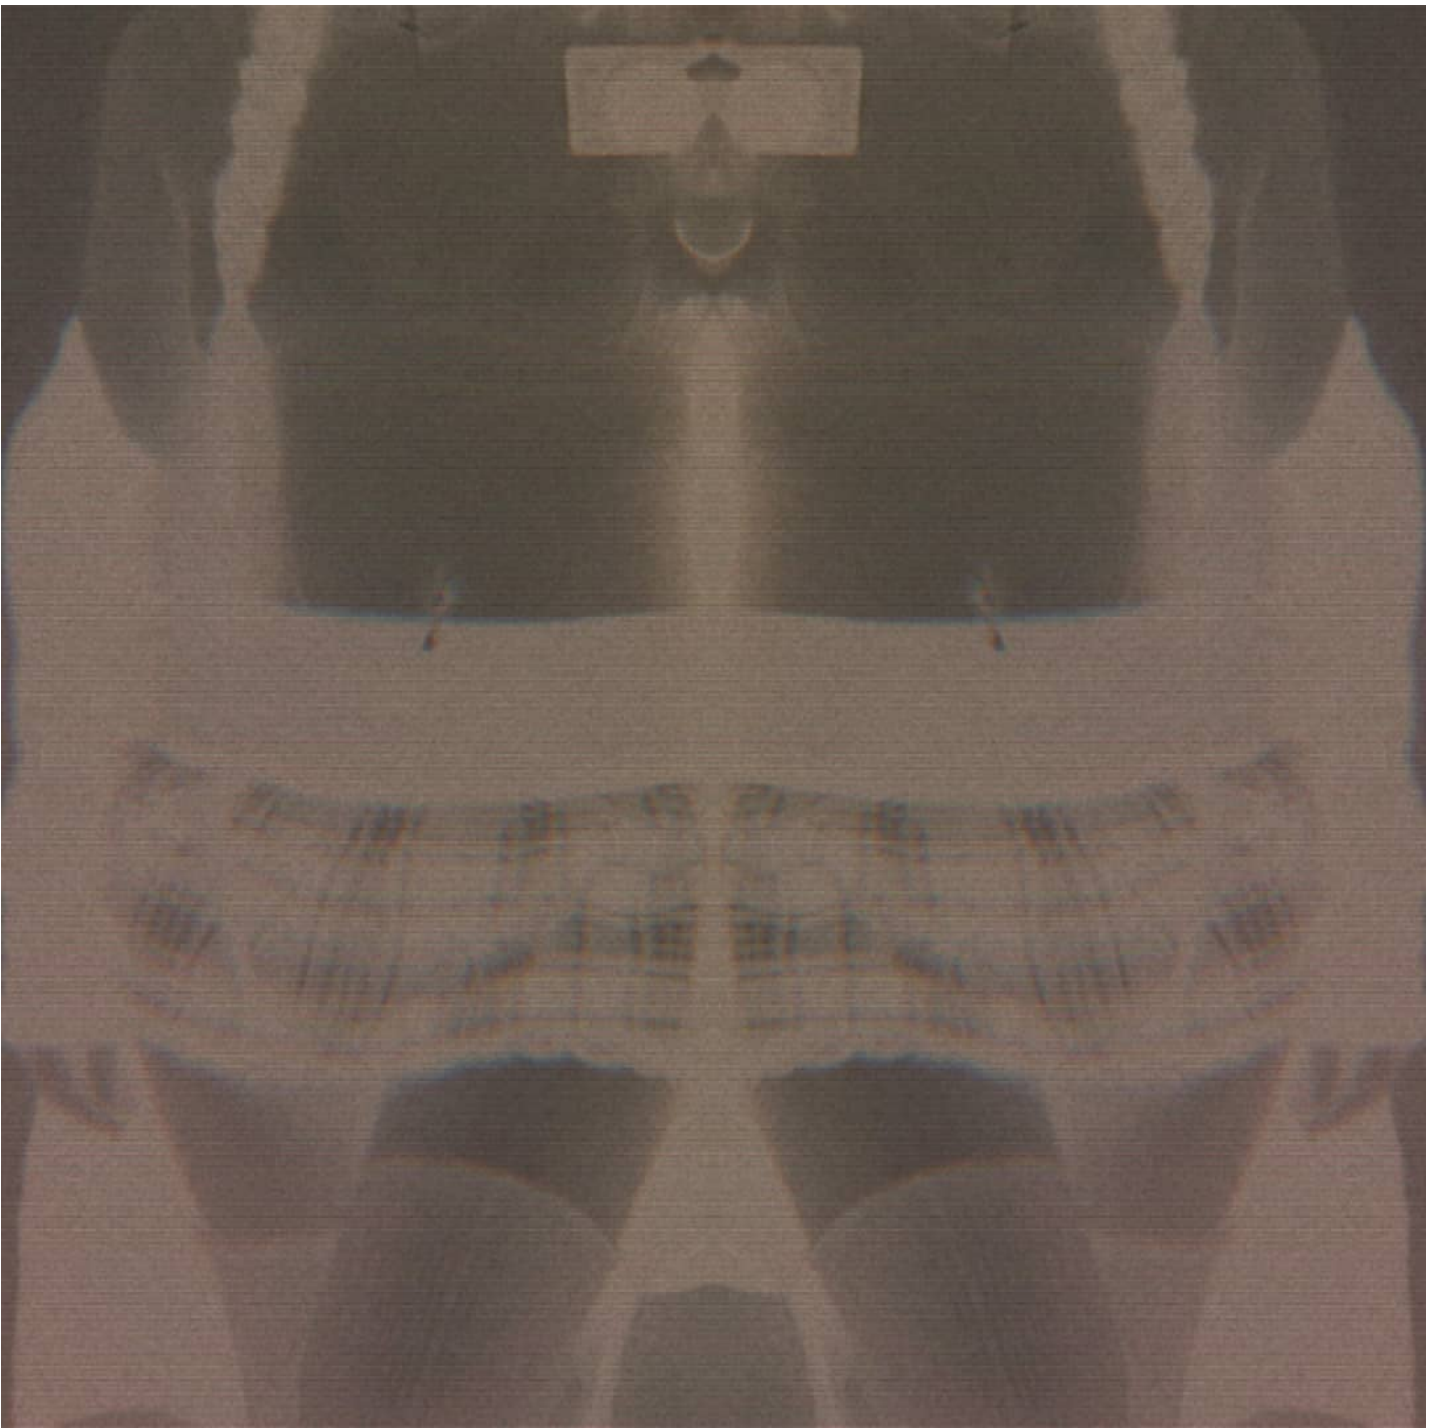

However if you're not religious, you can also do a white fast. There are many benefits to fasting outside of spiritual reasons such as; weight loss, controlling blood sugar, as well as just flushing out the toxins in your body etc. []
