Testosterone Propionate is a commonly manufactured injectable form of the primary male androgen hormone testosterone. The added ester to the testosterone - "propionate" is only responding for slowing down the rate in which the testosterone is released from the injection site (otherwise, without an added ester - the testosterone is going to dissipate too quickly as soon as it would be ...

The benefits I have seen in the last six months especially, after a couple of years of losing routine and structure, have been such a nice reminder of why I love the gym so much. It is so true when they say that exercise is the best anti-depressant. I've never finished a workout feeling worse than I have when I started. And this is why it's a huge part of my lifestyle. ☐

Testosterone Cypionate is a synthetic version of the naturally produced testosterone hormone. This hormone is responsible for many different physical and mental characteristics in males. It promotes sex drive, fat loss, helps with gaining and maintaining lean muscle mass, increases bone density, and may even protect against heart disease.
