□ On the flip side, it's not uncommon to see strong men with "chicken legs" (and it's not just because they don't train them - genetics play a key role), whereas women will often find they have a decent set of quads and hamstrings (women have the potential to carry children and need strong legs), hence why their lower body strength potential is HUGE!

Voltar a treinar depois de muito tempo parado requer diversos cuidados importantes que é preciso levar em consideração, tudo para evitar lesões e respeitar seu próprio corpo.
