For performance enhancing athletes, TURINOVER doses normally range from 40-60 mg per day. Total use should fall in the 4-6 week range; Standard female TURINOVER doses will normally fall in the 2.5-5mg per day range.

2. Build muscle mass & strength (with more time under tension through the exercise and more muscle damage it creates more stress on the working muscle and muscle growth also by slowing down the movement we minimise the stretch-shorten cycle)
