The correct dosage for Clenbuterol starts from 20 mcg per day to 120 mcg per day, depending on the level of the athlete. According to a study conducted among experienced users of Clenbuterol, a daily dose of 80 mcg can cause nervousness, while a dose of more than 100 mcg can lead to heartburn. For a single bottle of clenbuterol, you'll roughly pay \$2 to \$5 per tablet. Whether you pay the low or high-end of this range often depends on the shipping costs for the supplier. When going to a North America pharmacy, the cost per pill is more expensive, but the quality is almost guaranteed so you know what you're getting.

The correct Clenbuterol dosage starts from 20 mcg per day to 120 mcg per day as far as the user is comfortable with it. According to a research made among experienced users of the Clenbuterol pill, a daily dosage of 80 mcg can cause nervousness, while a dosage of more than 100 mcg can result in a heart burn. You need to start taking Clenbuterol with 20mcg per day. Gradually, this amount increases and by the middle of the course to 140mcg for men and 120mcg for women. The intake takes place by a ladder and by the end of the course the dosage is reduced until it is completely discontinued.

Clenbuterol forces your body to use stored fat as its primary source of energy before other sources are burned. Clenbuterol can be used alone or in a stack. It combines extremely well with thyroid hormones, particularly T3, and this combination has been proven to increase metabolism by up to 30%. [click here for more](#)
