Furthermore, there are rumours on the Internet that HGH fragment 176 191 is actively used by females preparing to participate in " Fitness Bikini " competitions. The drug is for professional athletes and beginners. In addition, it is suitable for those who adhere to an active lifestyle and sports for burning extra calories. What Is HGH Fragment 176-191? HGH Frag 176-191 is a growth hormone that releases peptide fragment 176-191 that regulates fat metabolism to allow the body to burn fat. It stimulates lipolysis (the breakdown of fat) and blocks lipogenesis (conversion of non-food material into fat).

HGH Fragment (HGH Frag 176-191) is a peptide hormone of the Growth Hormone (GH) class. Specifically, HGH Frag 176-191 is as its name implies a fragment of the GH hormone, a piece or part of the GH hormone. Human Growth Hormone (HGH), the tail end of the hormone is cut off and what's removed is HGH Frag 176-191.

HGH Fragment 176-191 is also referred to as AOD 9604. The fragment is effective because it regulates your fat metabolism. This enables you to burn additional fat. The Frag 176-191 stimulates lipolysis. This is the destruction or breakdown of fat. This inhibits your body from transforming food into body fat. This process is called lipogenesis. HELP! female's perspective on HGH Frag 176 needed! hey ladies! need advice on peptides, specifically HGH Frag 176-191. looking to drop bodyfat and maintain my gains. anyone with any information on dosage, cycling, stacking with other peptides for better results, diet details while running, overall experience.. i would really appreciate any.

HGH Fragment 176-191 Dosage Instructions. Amount to Inject: If you have used 1ml of water for mixing then a 250mcg dosage = 0.125ml (or 12.5 units on Insulin Syringe). If you have used 2ml of water for mixing then 250mcg = 0.25ml (or 25 units). If you have used 3ml of water for mixing then 250mcg = 0.375ml (or 37.5 units).

HGH fragment 176-191 is a modified part of the human growth hormone (HGH) molecule. In the scientific community, it is known as "tyr-hGH177-191" and "Anti-Obesity Drug (AOD) 9604". It has the reputation of an anti-obesity drug because it's made from the terminal part of the HGH molecule. What is HGH Frag 176-191? HGH Frag 176-191 is the tail end of the HGH sequence that specifically targets fat loss. The result is a fat-burning peptide without the negative aspects of GH like hunger and water retention. How does HGH Fragment work? This modified GH peptide works by isolating the amino acids 176-191 of human growth hormone (HGH).

Hgh Fragment 176-191 and

women Can women use this product and if so, how much, how often, and where do they inject? Any who knows women or knows the protocol for women using this stuff please advise me. My wife wants to try this stuff. 09-03-2007, 10:53 AM #2. Nickster#1. Banned Join Date Jul 2004 [see page](#)
