To date, Jintropin is among the best and most reliable drugs that are designed to build muscle. Somatropin speeds up metabolic reactions. Moreover, it has a fat burning effect. Nevertheless, it is necessary to consult a doctor before using Jintropin or other HGH analogues. Jintropin Effects Jintropin® is the only 191AA hGH brand in China. Jintropin® is the only officially approved hGH in China that are produced by its patented secretion technology to make it purely 191 amino acid hGH. Most of other Chinese

Jintropin is one of the most potent recombinant Human Growth Hormones on the market today. It is a proper 191 amino acid sequence Somatropin (natural to human body) and is produced by GeneScience Pharmaceutical Co, Ltd.

Somatropin Jintropin HGH Suggested for Adult Human Growth Hormone Deficiency, Short Stature for

Age, Idiopathic Short Stature, Pediatric Growth Hormone Deficiency, Cachexia, Turner Syndrome, AIDS Related Wasting, Pader-Willi Syndrome, Short Bowel Syndrome, Growth Retardation - Chronic Renal Failure, Noonan's Syndrome. Jintropin for Muscle building [in the know](#)

Before the existence of generic HGH labs in China, the yellow tops were used by Jintropin (GeneScience Pharmaceuticals), blue tops were used by Hypertropin (Neogenica Bioscience) and green tops were used for Igtropin (IGF-1 long R3). In 2007, both Jintropin and Hypertropin switched to using green color caps.

GH is expensive to make. That's the reason the cost is high. It's not as much a demand issue as it is a manufacturing issue. Someone selling cheap GH with good reviews is probably selling Ipamorelin and mod-grf in a bottle, raking in a nice profit, and avoiding getting caught because the idiots who buy cheap GH off of Alibaba are too cheap to run actual tests on it.
