For example, testosterone undecanoate, anavar and primobolan are just some oral steroids that pose little to no hepatic (liver) strain. Also trenbolone is one of the most potent injectable steroids, that will cause a exceedingly worse side effects, in comparison to mild oral steroids, such as anavar, primobolan or testosterone undecanoate.

Corticosteroids, also referred to as oral steroids, are synthetic drugs that mimic the hormone cortisol naturally produced by the adrenal glands. They work by tempering a hyperresponsive immune system, reducing inflammation either locally (in a specific part of the body) or systemically (throughout the entire body). [my explanation](#)
