This is an ultra powerful version of Sustanon which is recommended to professionals. Sustanon 300 - Pharma Sust 300 is made of: Testosterone Propionate 36 mg per mL (30) Testosterone Phenylpropionate 72 mg per mL (60) Testosterone Isocaproate 72 mg per mL (60) Testosterone Decanoate 120 mg per mL (100) Sustanon 300: Cycle, Dosage, etc. One of the greatest aspects of testosterone is that it can be successfully taken for a variety of goals - it stacks really well with the majority of anabolic compounds and doesn't tend to "encroach" on their territory by interfering in any way with their effects, regardless of the phase you're currently following.

Sustanon is a very popular steroid which is highly appreciated by its users since it offers several advantages when compared to other testosterone compounds. Sustanon is a mixture of four different testosterone derivatives which, based on the well-timed composition, have a synergistic effect.

Sustanon is an anabolic steroid that was developed by a company known as Organon Pharmaceuticals. This Netherlands-based company has produced a variety of compounds over the years and has been in operation since 1913. Sustanon is one of their most well-known steroids and, for a time, was easily their most popular.

As a heavily aromatizing steroid, the primary side-effects of Sustanon 300 will be those of an estrogenic nature as the aromatase process refers to the conversion of testosterone into estrogen. As estrogen levels increase, this can lead to gynecomastia and excess water retention, which can in-turn promote high blood pressure.

Rated 5 out of 5. November 6, 2021. I used a 12 week cycle of cutaxyl 150. Guys this stuff is legit, clean, and full strength. I went from 335 to 300 in this cycle and and put on a conservative 12 lbs of lean dry muscle. 3 months out I've kept every bit on gain I made in that cycle. OMG I'm hap py with the results. Due to the receipt of Sustanon 300 in the heart muscle, the main organ of a person functions without failures, because the heart is supplied with exactly the energy that is produced by fat. A small dose of Sust 300, equal to one gram,

can significantly improve a person's well-being and reduce the risk of heart disease.

As a heavily aromatizing steroid, the primary side-effects of Sustanon 250 will be those of an estrogenic nature as the aromatase process refers to the conversion of testosterone into estrogen. As estrogen levels increase, this can lead to gynecomastia and excess water retention, which can in-turn promote high blood pressure. [check it out](#)
