Deca-Intabolin (100 mg) (Nandrolone) Drug Price and Information. Nandrolone is an anabolic steroid, prescribed for anemia caused by kidney problems. The kidney normally produces a hormone called erythropoietin which is necessary for the production of red blood cells. Total knee replacement is one option to relieve pain and to restore function to an arthritic knee. The most common reason for knee replacement is that other treatments (weight loss, exercise/physical therapy, medicines, injections, and bracing) have failed to relieve arthritis-associated knee pain.
