Substance: Somatropin Manufacturer: Novo Nordisk Pack: 1 vial 45 iu (15 mg) [additional reading](#)

Norditropin® is a prescription medicine that contains human growth hormone and is used to treat: children who are not growing because of low or no growth hormone children who are short (in stature) and who have Noonan syndrome, Turner syndrome, or were born small (small for gestational age-SGA) and have not caught-up in growth by age 2 to 4 years

I have a question concerning Norditropin Nodiflex pens. I have the 10 mg 1.5 ml pen and I have been trying to figure out the dosage conversion to iu's. The pen has a dial up meter starting at .25 mg's going up to like 3 mg's. After searching the Norditropin site I have come to the conclusion that .50 mg's would equal around 2.7 to 3 iu's.

What is Norditropin Simplex

GH? Norditropin (Somatotropin) is the trade name for the synthetic Human Growth Hormone (HGH) that is being manufactured by the extremely big and famous pharmaceutical company: Novo Nordisk. This product is an injection for recombinant Human Growth Hormone (HGH) and is a polypeptide of recombinant DNA origin which is being synthesized by a certain strain of E. coli. Norditropin NordiFlex 15mg pen HGH 45 IU is a disposable, premixed, prefilled pen that makes taking growth hormone simple. Norditropin NordiFlex delivery pens are the only prefilled, multi-dose,

disposable growth hormone pens that, after initial use, can be stored at up to 77°F for use within 3 weeks.. Norditropin NordiFlex 15mg pen HGH 45IU have passed certification in many European countries.

I tried some "Generic HGH" and felt crazy "effects" 2 months later when I had 10 IU's left, I tried it on a preg-stick. And guess what.. I was pregnant. I'll post some pics of my Norditropin, I would really like to know if someone has tried these and if so, tell me your experience. [top article](#)
