First you can take the deca once a week or twice a week , which ever you prefer. And the sustanon has to be shoot every other day. So it would look like this deca 500mgs a week and sustanon 3 shoots a week Mon, Wens , FRIday for a total of 750mgs of test a week.Go for 14 week cycle and stop the deca 2-3 weeks before you stop the test . In fact, there's almost no difference between Sustanon 250 / 300 / 350.All these versions of Sustanon contain the exact same 4 testosterone esters combined together. Sustanon is a highly versatile testosterone, combining four different esters together to provide a slow "drip fed" release of testosterone throughout a sustanon cycle.

deca 300 & sustanon 350 questions. you should finish the cycle with sust and start PCT 18 days after your last sust shot. 03-29-2009, 08:00 PM #8. hellapimpin. Anabolic Member Join Date Aug 2002 Location SOuthern Cali Posts 2,359.

GOLD BOND

I just got ahold of Sustanon 350 and Deca 300. Just purchased the needles.. I am ready to go. Just wondering what would be a good dosage per week, and how many mls of each. Sus one day, deca another. Both together .. A friend of mine was telling me to take Deca on like Mondays, and Sus on Wednesdays. If anyone could help me out! thanks, looking to start it this starting week. [website](#)

Sustanon 350 Steroid Cycle and Dosage Dosages of Sustanon can vary greatly anywhere between 350mg every other week, to 1000mg a week. A good cycle is generally around 10 weeks, followed by PCT. Using around 350mg of Sustanon once a week, an athlete might expect to gain somewhere in the region of 20lbs.

Deca and Sustanon cycle is usually taken 2 grams per day, divided into doses of 500 mg. The greatest effect of taking a beneficial substance is observed in combination with anaerobic exercise. Tagged
