Trenbolone E200 (Trenbolone Enanthate) is an injectable steroid containing 200mgs per ML of the hormone Trenbolone Enanthate and used by bodybuilders to enhance their muscle mass and carry out other functions. Trenbolone Enanthate steroid has both androgenic and anabolic properties.

Finishing my tenth set today with 12 reps at 225 lbs. I've never done 12 at 225, let alone at the end of such a grueling complex and I kind of surprised myself...I like those kind of surprises.

Trenbolone Enanthate, called the nickname Trenabol, is a synthetic and injected anabolic androgenic steroid. It also a derivative of nandrolone that was never promoted. It is the C17 $\beta$  enanthate ester plus a long-acting prodrug of trenbolone. The anabolic steroids trenbolone enanthate is a powerful one.

Overall testosterone is something that only lifestyle and dietary specifics can help with because even if you was to do TRT and not practice the above, then nothing can help you.

Dude! Really been working on hitting my macros for my body type and workouts and I am finally seeing the scale go down! Last week I was down 3 from the start of quarantine and today I am down another 3.9 lbs. I've been "seeing" the progress but I do have to say it is nice to FINALLY see the weight # go down. Lol especially after going up and plateau-ing for so long.

J
