Equipoise, or EQ to all those experienced steroid users, is known to enhance athletic performance and be an integral part of any cycle (cutting, bulking or strength). Even though EQ may not be as popular as Deca-Durabolin or Winstrol, this steroid is used by many bodybuilders, athletes and regular gym goers all over the world.

# Self-Care & Mentoring for Kids

Share your own feelings to encourage self-awareness.

Find that like

Set aside time for low-stress or solo activities.

Focus on articulating feelings.

"I am angry."  
"I am sad."

Encourage journaling and diaries.

Encourage your child to focus on the moment.

Recognize toxic

Original EQ dosing was in the 400mg/week range, with 600mg per week being the sweet spot for most. It is a very slow steroid in all regards and 12-16 week cycles tend to be favored. I've run EQ at 400mg per week, 600 mg per week, and 900 mg per week while using test at 500 mg per week. only those two products were used. #barts #queenmarys #qmul #medicine #dentistry #queenmary #medicinememes #medmemes #med #memes #funny #medicalmemes #university #unimemes #uni #lecture #med #doctor #doctormeme #hospital #hospitalmeme #medical #medicalstudent #medicalschooll #student #studentmemes #humour #stocks #gme #studentloans ive run eq at 400/600/800 for 12 weeks gave it a few chances, personally i found it crap untill i fcuked the traditional 10-12 week cycles off and now have found sh1t happens with this med better at 16+ weeks, it works out expensive to get results and works out a long cycle , imo i would go with the tren. but thats just my opinion, many have had great results of 12weeks/400mgs, you have to try it ...
