nebido injection video

This video shows RBI's team identifying excess joint fluid via ultrasound, then removing the fluid followed by a Regenerative Injection Therapy! This patient had Joint Effusion which is the abnormal accumulation of fluid in or around a joint. It is a sign of joint inflammation and often caused by arthritis. In addition to swelling, joint effusion is associated with pain and stiffness. RBI's NON-SURGICAL Regenerative Injections add significant healing properties to the joint in order to stimulate tissue repair and to treat the underlying cause of pain. #growthfactors #platelets #jointinjection #prpinjection #plateletrichplasma #stemcelltherapy #stemcells #trugenta #exosomes #growthfactors ..
