

#1 Greetings everyone, I am 48 years old. 5'5", 150 lbs, 15% body fat. Currently doing a mild ketogenic diet to lose some adipose and bloat. I D/C'd t cyp at 87 mg/week via 3. 5 injections per week due to bloat, high E2 symptoms, and no "benefit" on 12/13/19. I cannot tolerate ANY AI. I use zinc at 50mg qd. I have tried every "natural" AI.

## Nandrolone Decanoate & Oxandrolone | Anabolic Steroids For TRT

Thirty human immunodeficiency virus-positive men with fewer than 400 CD4 lymphocytes/mm<sup>3</sup> were randomly assigned to receive weekly injections of nandrolone alone or in combination with supervised PRT at 80% of the one-repetition maximum three times weekly for 12 weeks.

### Deca Durabolin 101: All About Nandrolone Decanoate - John Doe Bodybuilding

100%. Nandrolone has some serious side effects, long term. It also has some potentially devastating side effects short term. The deca dick thing is real and it makes it a nonstarter for some of us. Your biggest risk with anavar is, really, you don't gain as much.

### [Compounds]Low Test(TRT) + High Nandrolone : r/steroids - Reddit

Sep 21, 2019 Messages 1,323 Reaction score 1,542 Nov 25, 2021 #1 First of all, Happy Thanksgiving guys. Hope all is well with everyone. Question: Thoughts on running 50-100/mg week deca in conjunction with 200mg/wk trt? The deca wouldn't be prescribed. I have read pros and cons regarding the protocol and looking for some feedback here.

### TRT + Nandrolone New Protocol | Excel Male TRT Forum

The primary benefit of combining low-dose nandrolone with TRT is increased muscle mass. Nandrolone is known for its ability to promote muscle growth and improve nitrogen retention, leading to greater gains in lean muscle tissue. The use of TRT can also help to maintain and even increase muscle mass by keeping testosterone levels in a healthy range.
