## rad 140 vs s23 SARMS side effects, results (personal Experience)

S-23 is slightly more powerful than Rad when it comes to muscle building. You're gonna feel like Garbage on S-23 unless you're running some sort of Test base. A PCT will be mandatory. If im being honest I prefer Rad over S-23. A friend of mine got Gyno from running S-23 so beware of that. I think the RAD is going to have the larger efficacy .

## Rad-140 vs S23 hairloss? My experience! : r/sarmssourcetalk - Reddit

Insane shoulder to waist ratio, genetically blessed. s23 is the stronger compound but the side effects are insane, you might end up having to PCT whereas rad 140 would be ""safer"". I'd go with RAD, less complicated and if its a first cycle you'll want to leave room to grow. edit - s23 is the only SARM you really need to PCT for.

S23 is pretty powerful. If it's your first cycle definitely use RAD at 5/7mg (imo) Not my first, ive done 25mg lgd-4033 stacked with 1 & 4 andro 100mg. ive also done 50mg s4. Bro you need to bulk the fuck up to 225 lean I'm 5'11 200 and have abs and lean either would work just lean bulk I heard s23 is the closes to riods and I heard rad is .

## RAD 140 vs S23 | Professional Muscle - Bodybuilding Forum

Var for strength. . s23 is probably better or as effective to make you veiny since it's supposedly an upgraded S4. Var is actually not that bad for strength even if it's far from the strongest aas in terms of muscle gains. I think you can go 30-50mg var but I would be cautious with the S23 dosage cause I've heard some mixed opinions about safety .
