How to Take Serostim® (somatropin) for injection

STEP BY STEP INJECTION GUIDE

What is Serostim®?
Serostim® is an injectable prescription medicine used for the treatment of HIV-positive patients with wasting or cachexia to increase lean body mass and body weight and improve physical endurance. Treatment with antiretroviral therapy at the same time is necessary.

Read this step by step instruction guide before you begin using Serostim®. Your healthcare provider will prescribe one of three dosage strengths based on your weight: 4 mg, 5 mg, or 8 mg. They will also show you how to prepare and inject your prescription the right way.

If you cannot give yourself the injection, ask your healthcare provider or a nurse to help you, OR ask someone who has been trained by a healthcare provider or nurse to give you your injections.

The step-by-step illustration is displayed below. The long and long single dose vials come with the water diluent for mixing and the long and short needles with backer needles under a cap for mixing.

What do I need for my Serostim® injection?

- A. Serostim® vial containing the medication as freeze-dried powder.
- B. Diluent (liquid) for mixing.
- C. Two needles, a single 29-gauge needle, a shorter 29-gauge needle, one syringe.
- D. Alcohol swabs to clean the vial tops and skin before injection.
- E. Bandage or gauze pads to cover injection site.
- F. Sharps container (may vary in appearance).

Note: Not all items listed for this injection may be provided for your pharmacy. Make sure all items listed are available before you begin. Some items may be provided by your pharmacy, such as a syringe. A syringe of the same volume as the Serostim® vial is required for mixing. Check the instructions for details on how to use the medication.

Been taking for 3 Months now 2 IU S Daily. I got it from a Gym Trainer I want to Trust so badly but
lately been having doubts after reading how much fake stuff out there. My Hands get lil tingle , little
stiffness of wrist.

CRS Report for Congress

**Food and Drug Administration (FDA):
Overview and Issues**

Erin D. Williams
Specialist in Public Health and Bioethics
Domestic Social Policy Division

Summary

The Food and Drug Administration (FDA) is the agency within the Department of Health and Human Services (HHS) that regulates human and animal drugs, medical devices, biologics, and most foods. This report describes FDA, surveys agency-related issues Congress faces, and cites CRS reports where readers can find more information.

FDA Overview

FDA is an agency within HHS that regulates a wide range of products valued at more than \$1 trillion. (See **Table 1.**) The agency is responsible for the *safety* of most foods (human and animal) and cosmetics, and it regulates both the *safety* and the *effectiveness* of human drugs, biologics (e.g., vaccines, blood and blood components), medical devices, and animal drugs. In many cases, its responsibilities abut those of other agencies. (See **Table 1.**) In such cases, interagency agreements may define the regulatory boundaries.

The primary law authorizing FDA activities is the Federal Food, Drug, and Cosmetic Act (FFDCA; 21 USC Chapter 9). (See **Table 2.**) FDA is also responsible for implementing provisions in other laws, most notably the Public Health Service Act (PHSA; 42 USC Chapter 6A). For example, FDA's authority to regulate most human biologics flows both from the PHSA (§351) and from the FFDCA. (See **Table 2.**)

FDA has three offices that perform agency-wide functions. The Office of the Commissioner conducts overall agency coordination. The Commissioner, FDA's top official, requires Senate confirmation. The Office of Chief Counsel handles the agency's legal needs. FDA's largest office, the Office of Regulatory Affairs (ORA), handles FDA's inspection and enforcement activities. It employs about one-third of the agency's personnel.

FDA's product-specific regulatory responsibilities are handled by five centers: the Center for Biologics Evaluation and Research, the Center for Devices and Radiological Health, the Center for Drug Evaluation and Research, the Center for Food Safety and
