Sustanon 250 is a commonly prescribed drug for treating low testosterone levels in men (TRT). This steroid compound is used by athletes and bodybuilders to gain muscle mass and increase strength. Also known as Dura-Testin, Sustoplex and Sostenon, this anabolic androgenic steroid is a blend of four components of Testosterone -- Testosterone propionate 30 mg, Testosterone decanoate 100 mg ... Two popular methods of therapy are through Sustanon 250 and Testosterone Enanthate. Which one is better to use? Sustanon 250 Is the Most Popular Steroid. How popular is Sustanon 250? It is often given to all anabolic cycles, even though it is a specific kind. It contains four testosterone esters and is specifically designed to help create a ... #abstract #abstractart #abstractpainting #digitalart #digitalabstract

Sustanon 250, being a fairly long-estered combination of Testosterone, takes a bit longer to "kick in" but benefits from this anabolic compound can be achieved with less of frequent injections. Testosterone Enanthate, on the other hand, is required to be administered every week due to shorter esters though its effects are quicker than Sustanon. Sustanon Vs Test E Some contemplate which substance is better in regards to plain test enanthate variants and testosterone mixes (which in this instance is sustanon.) Sustanon is truly the superior product. Comparing Sustanon and Testosterone Enanthate

Sustanon 250 vs Test E? Sup bros, ... I know you get more bloat of test e but i hear that recovery time is better since you can start pct 2 weeks after the last injection and not 3 week like sus. Also, since test e has more bloat, i assume this is more prone to gyno? #bettertogether #betterbybell #betterbybelltherapy #mentalhealth #therapy #journey #lifegoals #adulting #psychotherapy #counseling #health #calm #kindness #love #selflove #self-esteem #family #couples #goals #meditation #mindfulness #Anxiety #Depression #PTSD #ADHD #Parenting #stress #financial #mentalwellness #mentalhealthsupport I'm on Sustanon 250 600mg/week, pinning EOD since it has short esters in it. The advantage of sust over test-e (other than price - my supplier's sust used to be a little cheaper than his test-e) is just that the load-time is a little less due to the faster release rate of the short esters in the blend.

A normal cycle lasts for 8-12 weeks depending on the person's goals. However, seasoned users might use up to 1000 mg/week or even more.
