The Surgeon

In the case of Proviron, while structurally very anabolic, the Mesterolone hormone converts and reduces to Diol metabolites, in turn reducing anabolic activity. However, Proviron's androgenic rating is a different story. In fact, its translatable androgenic activity appears to commonly be higher than its structural rating would imply. In a steroid cycle, adding Proviron accomplishes nothing further. Or in the case of anabolic steroids such as nandrolone (Deca) which for other reasons may adversely affect libido, Proviron provides no greater help against that than do various other anabolic steroids.

#physiotherapyindia #physiotherapyclinic #photographylovers The short of it is Proviron is a DHT drug,
so you have effectively pushed yourself closer to your own genetic threshold for hair loss if you're prone
to it. Tough part is whether it actually follows the mothers side or not. Dianabol is quite a heavy one as
well that is known for the same. I would wait a bit, then consider what's next. #ftm #ftmtransgender
