My creatinine in the reports read 1.7mg/dl. That was not a shocking value but my doctors were a little concerned and cautious with my case. And post this, we kept a check on my kidney parameters and it was seen that the creatinine was on the increasing trend and that my left kidney had started shrinking. It started from 1.7 mg/dl, then jumped to 2mg/dl, then 3mg/dl along with an elevation in my BP readings. My doctors then told me that the kidney functions were dropping and that the damage would be irreversible (year 2009). I was told that my kidneys would eventually give up within 8-10 years. And it exactly happened that way. Turanabol (Dragon Pharma) is a strong derivative of Dianabol. The best suited for the first stage and for those who are highly sensitive. Form: Oral.
