@dayefitness

I had no helps. Cleaning, cooking and utensils, yes hell lots of utensils to wash. Yet going on my building's terrace , doing intense HIIT , running in the compound , skipping in the reception area and still eating in control. It was such a journey.

Testosterone enanthate is a clear or yellowish viscous fluid supplied in a 5-milliliter (mL) multi-use glass vial. It is injected intramuscularly into the buttocks every one to four weeks. To avoid the fluctuating hormone levels (and the associated mood swings), lower dosages are often prescribed over shorter intervals.
