Contiene liotironina sodica che è una forma sintetica di tricodidetironina (L-T3) e L-tiroxina (L-T4). Il bitiron assomiglia agli effetti dell'ormone tiroideo naturale. Vantaggi di Bitiron T3 e T4 Mix: Normalmente, la ghiandola tiroidea di una persona sana produce due diversi ormoni uno è L-tiroxina (L-T4) e l'altro è triiodio-tironina (L-T3). Bitiron is a synthetic preparation of T4 and T3 in a 4:1 weight-based ratio. These hormones enhance oxygen consumption by most tissues of the body and increase the basal metabolic rate and the metabolism of carbohydrates, lipids and proteins. [this content](#)
