\$ 150.00 - \$ 700.00 Drostanolone propionate Medication Description DescriptionDrostanolone propionate, or dromostanolone propionate, sold under the brand names Drolban, Masteril, and Masteron among others, is an androgen and anabolic steroid medication which was used to treat breast cancer in women but is now no longer marketed. Masteron 200 is an anabolic steroid whose main active ingredient is Drostanolone Enanthate. Since Drostanolone is a derivative of dihydrotestosterone, it exhibits strong androgenic activity, combined with moderate anabolic properties. However, Masteron interacts weakly with adrenergic receptors and is not able to aromatize. [how you can help](#)
