\$ 89.95 Add to cart Primobolan® increases nitrogen retention which in turn improves protein synthesis in muscle tissue. This allows an increase in anabolic activity and creates an environment that allows your body to build muscle at a much faster rate. Primobolan dosage and cycles. The ideal Primobolan dosage for men is approximately 200-400mg per week, or 50-150mg per day (if you're competing). For women, this is dramatically less at just 50-100mg a week (although some studies suggest 25-75mgs per day is safe). Tips : [browse around this site](#)
