I get a lot of messages from people asking about what I do for a career. Many of you know I work predominantly with youth and adolescents, but since quarantine started I really began spending time working with adults remotely training them and in building individualized programs for their home gyms or current “gym” set up. My Dissertation actually focused on researching compliance to online virtual training with teachers I worked with during my doctoral studies, while I taught Physical Education in an elementary school. I have been just super thankful for Instagram and virtual connections during this isolating time, I sincerely thank everyone for checking out my page and interacting even in small ways. I’m a person that likes to work, and it’s been fun to put time and energy into this side of my professional career that often takes a back seat with how crazy life normally is. Stay strong and keep crushing your goals, consistency over time will pay off!
