

## Helios Clenbuterol Cena

**→ GO TO OUR ONLINE STORE ←**

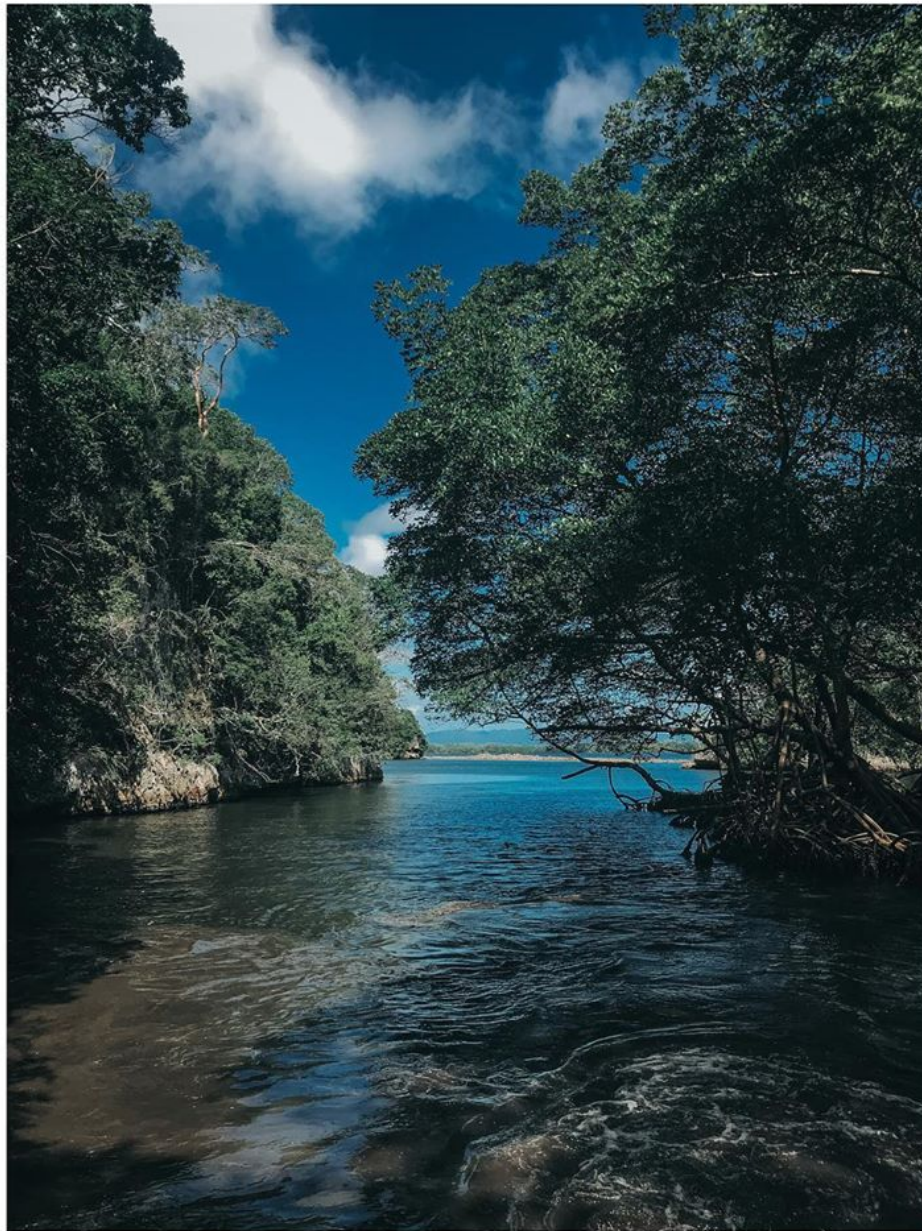

Helios clenbuterol is comprised of 40 mcg clenbuterol and 5 mg of yohimbine. Clenbuterol is a fat burner that raises the body's temperature in order to more quickly burn calories. Yohimbine is an alpha-2 receptor antagonist, which blocks the activity of certain chemicals in the body to promote fat loss.

Es ist toll Menschen zu haben die einen in jeglicher Form Supporten @kimcentner mit unerträglichen Trainingseinheiten die ich auch nur aushalte weil sie dabei ist ❤️. Dann mein Bruder @gianluca teil der mir immer mit seinen Snaps im Fitnessstudio ein schlechtes Gewissen macht ☐!!☐

A combination of two routinely used fat loss agents; Helios is a mixture of 40 mcg Clenbuterol to 5 mg Yohimbine HCL, per ml. At first glance, there doesn't seem to be anything special about this basic formulation, making it easy to question its overall appeal in comparison to traditional versions of these drugs.
